

-

Registered Nurses (RNs) – Oversee every element of a client's care, such as: patient assessment; case management and care coordination; Fingerstick/Protime INR monitoring; assessing nutrition, hydration, bowel and bladder functions; assessing and teaching medication regimes and monitoring response to medications; diabetic teaching and management; advanced wound care and wound VAC therapy; post-surgical care; oxygen therapy and management; catheter care and changes; ostomy care (colostomy, ileostomy, urostomy; IV therapy, tube feeding; pleurex drainage; disease treatment, management and prevention; Venipuncture; Flu Pneumonia Immunizations, etc.

- **Licensed Practical Nurses (LPNs)** provide dressing changes, treatments, medication and observe client's condition, as well as provide health teachings.

- **Home Health Aides (HHA)** work directly under the supervision of an RN and assist with all personal care: bathing, dressing, toileting, ambulation, monitoring of vital signs and light housekeeping. Gold Health Home Care, Corp., HHAs are all certified by the State of Illinois.

- **Medical Social Workers (MSWs)** assess clients' needs for other services and facilitate referrals to those that are available within the community.

- **Registered Therapists** help clients attain their optimal level of activity:

Physical Therapists (PTs) work with all body muscles, particularly the lower extremities.

Occupational Therapists (OTs) concentrate on the use of upper extremities for self care.

Speech/Language Pathologists (SLPs) focus on speech, cognitive and swallowing functions of the patient.
